Subject Fw: West Lake OU2 FS

Cecilia,

I order to meet our targets of completing a Record of Decision for both OUs at the West Lake Landfill site we will need to expedite our current schedule. We are in agreement with MDNR and the PRPs on the approach for both OUs and both MDNR and EPA have reviewed and commented on the OU1 (Radiation Wastes Portion of the Landfill) FS which is nearly complete. MDNR and EPA have just recently received the draft FS for OU2 (Rest of the Landfill) and need to comment back to the PRPs on the document. The part of the schedule we can most control is our review times. An important aspect of the MDNR review will need to come from their solid waste program and we will need to request a shorter than normal turnaround time for the review. We can propose to have meetings to facilitate review and comment. This is an important target and since we are in general agreement on the remedy, it could still be possible to achieve our goal.

Can you suggest a way to facilitate this effort?

gene gunn

Subject West Lake OU2 FS

FYI - Following up on the impromptu meeting we had after the Weldon Spring event, I contacted the PRP contractor to see if they could provide an electronic version of the Draft OU 2 FS that could be readily distributed to DNR solid waste and others who need to review it. It seems Eric Gilstrap and Shawn Munks were on the ball and had already made the request and had already been sent an electronic version on April 7th. I called Eric to confirm. Eric indicated that they got what they needed and had already distributed to Solid Waste, Air, DGLS, and the AGO.
